

Workshop Introduction

2nd Training Workshop

Community Vulnerability and Adaptation to Climate Change Assessment

Suppakorn Chinvanho
Southeast Asia START Regional Center
Chulalongkorn University
Thailand

Workshop focus

- Assessing current context of the sector and community.
- Assessing current risk and vulnerability of the community to climate threat.
- Assessing future risk of the community and robustness of current risk management strategy/plan and also effectiveness of current development/risk reduction plan in the plausible future.
- Formulating a plausible future concerns of the community.
- Formulating an adaptation strategy for each community.
- Identifying options for measures to mobilize the adaptation strategy, evaluation, assess enabling factor/critical success factors.

Workshop Focus

- Assessing community climate change risk using future climate data and vision of future community
- Learn and practice how to work with future climate data for community risk assessment

Climate change adaptation planning >>> Rural development planning that aims for more climate resilience in the long term

2nd Training Workshop Community Vulnerability and Adaptation to Climate Change Assessment

Day 1

Wednesday 26th October – Morning sessions – 0900-1200

- Welcome address
- Introduction to workshop objectives and process
- Lecture session: Recapture on community risk assessment and future scenario preparation
- Lecture session: Climate change and future risk assessment – concept and examples

Wednesday 26th October – Afternoon session – 1330-1600

- Lecture session: Using future climate data for community climate change risk assessment – A simplified method
- Lecture session: Working with future climate data – An introduction
- Summary of the day

Day 2

Thursday 27th October – Morning session – 0900-1200

- Discussion session: Case study – Framing for community future risk assessment
- Group exercise session: Case study exercise – Climate change analysis for community risk assessment
- Group presentation: Climate change analysis

Thursday 27th October – Afternoon session – 1330-1600

- Discussion session: Country case study – Community scenario and frame for climate change risk assessment
- Group exercise: Country case study - Climate change analysis and community risk assessment –
- Summary of the day

2nd Training Workshop Community Vulnerability and Adaptation to Climate Change Assessment

Day 3

Friday 28th October - Morning session – 0900-1200

- Group exercise: Country case study - Climate change analysis and community risk assessment (continue)
- Group presentation session: Country case study - Climate change analysis and community risk assessment – Country case study

Friday 28th October – Afternoon session – 1330-1600

- Discussion session: Country case study - Community's risk and vulnerability to climate change
- Workshop conclusion – Introduction to Workshop 3
- Reserved for further discussion

THANK YOU
